

*“Protecting the Health of Your Business”*

Caroline Taylor, RN, has 25 years of nursing experience and 21 years of experience as President of Taylor Made Diagnostics. Since founding the company in 1995, Caroline has developed an occupational medicine clinic and mobile occupational delivery system to meet the changing needs of Taylor Made’s Federal, State and commercial clients.

On a daily basis, Caroline oversees all aspects of site operations and has implemented various continuous quality improvement programs that have garnered the trust and confidence of her customers and their employee workforce. Caroline has worked with over 1600 Hampton Roads Businesses like BAE Systems, Oceaneering, Norfolk and Southern Railroad and Dollar Tree to Protect the Health of their business.

Caroline has worked closely with clients to develop performance measurements and patient-encounter reporting systems that have enabled her team to measure provider performance and productivity levels with a true emphasis on monitoring client satisfaction. Caroline holds an associate’s degree in nursing. Taylor Made Diagnostics has been the only occupational medicine focused practice available in Hampton Roads.

This has made a significant difference to Taylor Made’s marine and Industrial customers. Overall, Taylor Made Diagnostics supports local businesses throughout Hampton Roads providing occupational medicine, OSHA compliance and workers’ compensation care.

In August 2008, Caroline received an Entrepreneurial Excellence Award for Taylor Made Diagnostics, Inc. from Inside Business and Regent University.
